

From the President

The Editorial Board of the Bulletin has been recently reconstituted. **Anupama G C** of the *Indian Institute of Astrophysics*, Bangalore will be the new Editor, and **Saikia D J** of the *National Centre for Radio Astrophysics*, Pune would be the new Associate Editor. I send my good wishes to the new Board for their endeavour.

On behalf of the society I express our thanks and appreciation to the outgoing Editor Harish Bhatt, the outgoing Associate Editor Biman Nath, and other members of the outgoing Board for managing the Bulletin so well.

A committee chaired by Prof. G Srinivasan of Raman Research Institute, Bangalore has just completed preparing "A Decadal Vision Document" on Astronomy & Astrophysics. The Executive Council would do whatever it can for implementation of the recommendations made in this document. I look forward to hearing from the members their suggestions for implementation of the recommendations.

The initiatives taken by ISRO in planning ASTROSAT, a multi-wavelength satellite, bring a promise of new opportunities for space astronomy in India, and I urge the members to seriously consider making use of this opportunity.
